

Quality, Environmental, Health & Safety Policy

Crimsun Organics Private Limited (COPL) is aspiring to become one of the preferred global supplier to manufacture and supply Agro-chemical Technical products to satisfy the customers across the globe and play a generous and responsible role in the development of society around the company.

Crimsun Organics Private Limited is committed to provide a safe, clean and healthy working environment and to follow operating procedures that will safeguard people & the property and protect the environment and natural resources.

This will be realized through

1. Improving the processes, technologies, and systems by eliminating the losses and hazards, reducing the consumption of resources and enhancing the product quality, productivity, and yield.
2. Preventing injury, ill health and pollution by taking proactive measures.
3. Meeting the needs and expectations of the interested parties by ensuring compliance with laws, regulations, voluntary obligations, and country-specific regulatory standards on Quality, Environmental, Occupational Health & Safety.
4. Consultation and participation of the workers at all levels.
5. Knowledge management by acquiring, analysing, storing, and disseminating information related to Quality, Environmental, Occupational Health & Safety.

Each employee has the responsibility to give Environmental, Health and Safety top priority and proactively contribute to establish a safety culture in our company.

We are committed to reduce the QEHS risks by implementing and continual improvement of the QEHS management system thereby enhancing the QEHS performance. Top Management ensures the QEHS-IMS Policy is communicated within the organization and made available to the interested parties.
